

Signage

Media List

Foamcore:

- Not recyclable or biodegradable in normal situations
- Lightweight
- Warps and bends easily
- Ideal for smaller mounted pieces such as callouts and arrows
- Soft, clean edge
- Dents easily
- Not waterproof
- Vinyl color output
- Latex ink offers UV protection

Enduraplast:

- Not recyclable or biodegradable in normal situations
- Mid-point rigidity between Foam (least rigid) and Gatorboard (most rigid)
- Can dent when falls
- Ideal for medium size signs (24" x 28")
- Not waterproof due to the lightweight foam innards
- Vinyl color output
- Latex ink offers UV protection

Gatorboard:

- Can be recycled
- Most durable, can be used up to 2 years
- Does not dent easily
- Ideal for larger size signs (eg. 24" x 36", 36" x 48")
- Rougher edges than foam or enduraplast
- Slight waterproof characteristic can withstand light moisture but not submerged
- Vinyl color output
- Latex ink offers UV protection
